Senior Full Stack Developer with 7+ years of experience building ERP, e-commerce, fintech and business platforms with .NET Core, React and Node.js (MERN stack). Currently Manager of a 20-person team at Tecno Sphere, with remote experience for Italy-based Sorgente FamiCord and US-based LEO Innovate. Built a salon ERP with Google Calendar sync and AI-generated replies to Google Business Profile reviews, and cut query execution time by 30% on a custom B2B/B2C ERP. Strong in microservices, CQRS, Docker/Kubernetes CI/CD and database optimization.

EMPLOYMENT HISTORY

Manager, Tecno Sphere (On-Site) **Jan 2020 – Present**

Pakistan | Team of 20

- **Manage a team of 20**, overseeing delivery, technical decisions and day-to-day operations end to end.
- Built a 3D Dental Management System supporting complete dental procedures with interactive graphical teeth visualization.
- Developed a currency exchange platform on .NET and React with real-time forex rates, secure transactions and financial reporting.
- Designed and deployed CI/CD pipelines with Docker and Kubernetes, automating builds, testing and deployments.
- Engineered microservices with .NET Aspire, using Redis, CQRS, Mediator and Repository patterns for high-performance applications.
- Improved website speed and scalability through query tuning, indexing and caching.

Senior Full Stack .NET Developer, LEO Innovate (Remote) **Nov 2025 – Aug 2026**

Part time | United States | Salon ERP system

- Developed a salon ERP system for a US-based client, delivering full-stack features on .NET and React.
- Implemented Google Calendar sync, so appointments booked through Google Calendar were created automatically in the salon system.
- Integrated the Google Business Profile API to pull customer reviews into the ERP automatically.
- Built an AI integration that generated replies based on each review and posted them back to Google Business Profile, automating review management.

Senior Full Stack .NET Developer, Sorgente FamiCord (Remote) **Oct 2022 – Feb 2025**

Contract | Italy

- Engineered a custom B2B/B2C ERP system integrating accounting, inventory and order management with real-time analytics.
- Built warehouse and shipping vendor integrations on a scalable API-driven architecture, automating inventory tracking, order fulfillment and logistics.
- Optimized complex queries, stored procedures and indexing, reducing query execution time by **30%**.
- Integrated digital signature libraries to automate document authentication, e-contract execution and compliance workflows.
- Designed and implemented microservices architectures, improving scalability, fault tolerance and maintainability.
- Developed automation scripts that reduced manual effort and improved operational efficiency.

Full Stack Web Developer, Softarena Solutions (On-Site) **Dec 2018 – Oct 2019**

- Built custom software that streamlined business workflows, then moved into .NET development of scalable web apps, accounting systems, payroll platforms and CMS solutions.
- Developed e-commerce platforms with payment gateways, order management and inventory tracking.
- Automated financial reporting, tax calculations and ledger management for enterprise accounting software.
- Tuned database performance with query optimization, indexing and caching.

SKILLS

Languages: C#, C++, JavaScript, SQL

Backend: .NET Core, ASP.NET, .NET Aspire, Web Forms, Node.js, Express.js, REST APIs, Web APIs, Web Services

Frontend: React.js, HTML, CSS, Bootstrap

Databases: SQL Server, MySQL, PostgreSQL, MongoDB, Redis

Architecture: Microservices, CQRS, Mediator pattern, Repository pattern, MERN stack

DevOps: Docker, Kubernetes, CI/CD pipelines

Integrations: PayPal, Stripe, card checkout APIs, Google Maps, Google Calendar, Google Business Profile, digital signature libraries, warehouse and shipping vendor APIs

PERSONAL PROJECTS

Built with the MERN stack (MongoDB, Express.js, React, Node.js):

- **Solar Management System:** solar production, sites and panel billing tracked in one dashboard.
- **Scrap Management System:** scrap stock, vendor buying and selling orders in one place.
- **Gym Management System:** members, plans, check-ins and fee tracking.
- **Wholesale Shop POS:** counter checkout with stock, a live credit ledger and billing.

EDUCATION

Bachelor of Science (BS), Computer Science, GIFT University Gujranwala **2013 – 2018**
Specialized in Web Development and Database Management. Final-year project: a Capstone Management System for project proposal submission, faculty supervision, progress tracking and evaluation.

Intermediate (Pre-Engineering), Elite Science College **2011 – 2013**

Matric (Science), Jadeed Dastgir Ideal High School **2009 – 2011**
